**Special needs**

Should you have a disability, dietary restrictions, or other special requirements, contact the Office of Continuing Medical Education by May 16th to discuss your needs.

**Attire**

Attire for the course is neat casual. Since everyone has a different comfort level, we suggest that you dress in layers or bring a sweater.

The AMC Professional Image Standards Policy is in effect at AMC-sponsored education programs. Employees must comply with the AMC Professional Image Standards Policy when attending AMC sponsored educational events.
ABOUT THE COURSE
Changes occur rapidly in the field of HIV medicine. This course is designed to provide practitioners who care for and/or interact with HIV-infected persons with the most up-to-date information available on a variety of HIV/AIDS-related topics. Presentation formats include didactic sessions and interactive case presentations, followed by subsequent question and answer periods.

We are proud this year to welcome Jeanne White Ginder, mother of Ryan White, who will share with us the legacy of her son. Following Ryan’s death in 1990, Jeanne continued to dedicate herself to Ryan’s dream of easing the stigma and discrimination faced by so many people living with HIV/AIDS. She still speaks to a vast array of audiences about her family’s experience and the role Ryan played in opening so many hearts and minds. She remains a vocal advocate for HIV/AIDS programs including the program named for her son, the Ryan White Care Act, funded by the Health and Human Services Resource Administration.

COURSE OBJECTIVES
After attending the course, participants should be able to:
• Discuss the current standards of care for initial and subsequent treatment of HIV infection.
• Identify common medication interactions with HIV medications.
• Interpret parameters of resistance tests and when resistance testing is indicated.
• Discuss the current standards of care and evaluation and treatment of bone disease related to HIV.
• Discuss the New York State HIV Testing Law and implementation progress.
• Discuss the assessment of an HIV patient to prepare for liver transplant.

TARGET AUDIENCE
The symposium will be of interest to physicians, physician assistants, nurse practitioners, registered nurses, pharmacists, social workers, mental health practitioners, and case managers who care for those infected with HIV.
