Congratulations on your choice of a career in Otolaryngology!

It doesn’t seem like too long ago that we were in your position, deciding to become Otolaryngologists, and then trying to figure out where to do our residencies! Although we may be biased, we agree that our decision to train at Albany Medical Center was right. The Albany Medical Center residency program promotes a gradual progression of responsibility and autonomy, allowing residents to develop into confident, responsible, and capable clinicians and surgeons. Our experience is diverse and we are fortunate to have a wide variety of fellowship-trained attendings to mentor us in every aspect of our field.

Whether your future interests involve further fellowship training, or going out into practice, this residency will prepare you well for either endeavor.

Sincerely,

Pardis Javadi, MD
Chief Resident

Jason Roberts, MD
Chief Resident
